4.2.3 DETAILED REPORT OF ACTIVITIES AND LIST OF STUDENTS BENEFITTED DUE TO EXPOSURE TO LEARNING RESOURCE

DENTAL LAMINATES

Date : 17.09.2014

Time: 09:00 AM - 04:00 PM

Venue: Phantom Head Lab

Department : Prosthodontics

No. of students: 73

Summary:

Dental laminates are aesthetic materials that provide excellent clinical performance and hence the most aesthetic and least invasive of management of unaesthetic teeth. The materials and techniques applied enhance the patient's smile in a minimally invasive way. As the concepts of tooth preparation have changed over the past years, it is important to update the latest techniques in the application of laminates. The students gained knowledge on the need for laminates, indications and contraindications, tooth preparation techniques, impression making and cementation. They also gained hands on training and were assessed on their tooth preparation skills for laminates.

Outcome:

Knowledge on tooth preparation techniques for laminates and their application in clinical cases.

IMPLANT SYMPOSIUM

Date : 02.10.2015-04.10.2015

Time: 8.30 AM - 3.30 PM

Venue: 375 Auditorium

Department: Prosthodontics

No. of students: 70

Summary:

Dental implants do much more than replace missing teeth. They help maintain and strengthen bone structure, provide the ability to chew healthy food, and give patients the confidence to smile. They also protect existing teeth by helping to preserve bone structure. Hence, sound knowledge about the surgical procedure, case selection, bone anatomy must be known to the clinicians before placement. The key to success of an implant depends on its placement for successful and ease in prosthodontic rehabilitation for the final crown. The student learnt the case selection, implant placement and surgical techniques including complications. They were also exposed to a live demo and hands on training on implant placement on models.

Outcome:

The students learnt the application and placement of implants in dentistry by simulation learning.

SEDATION IN PEDIATRIC DENTISTRY

Date : 07.04.2017

Time: 9.00 AM - 4.00 PM.

Venue: Mini Auditorium

Department: Pedodontics

No. of students: 47

Summary:

To perform the highest quality dental care in paediatric patients, all students must know pharmacologic behaviour management techniques. Conscious sedation through nitrous oxide-oxygen offers a safe and feasible option for students to make children cooperative during dental treatment. The students learned the equipment basics, need for conscious sedation, indications contra indications, side effects, patient selection, prerequisites, assessment, patient preparation, administration and reversal of nitrous oxide and safe monitoring and discharge of children under sedation. They also had hands on access to administer and experience nitrous oxide sedation.

Outcome:

Case selection and practical application of nitrous oxide oxygen conscious sedation in children.

BASIC LIFE SUPPORT FOR BEGINNERS

Date : 08.06.2018

Time: 10.00 AM - 01.00 PM

Venue: Skills Lab

Department: Oral Surgery

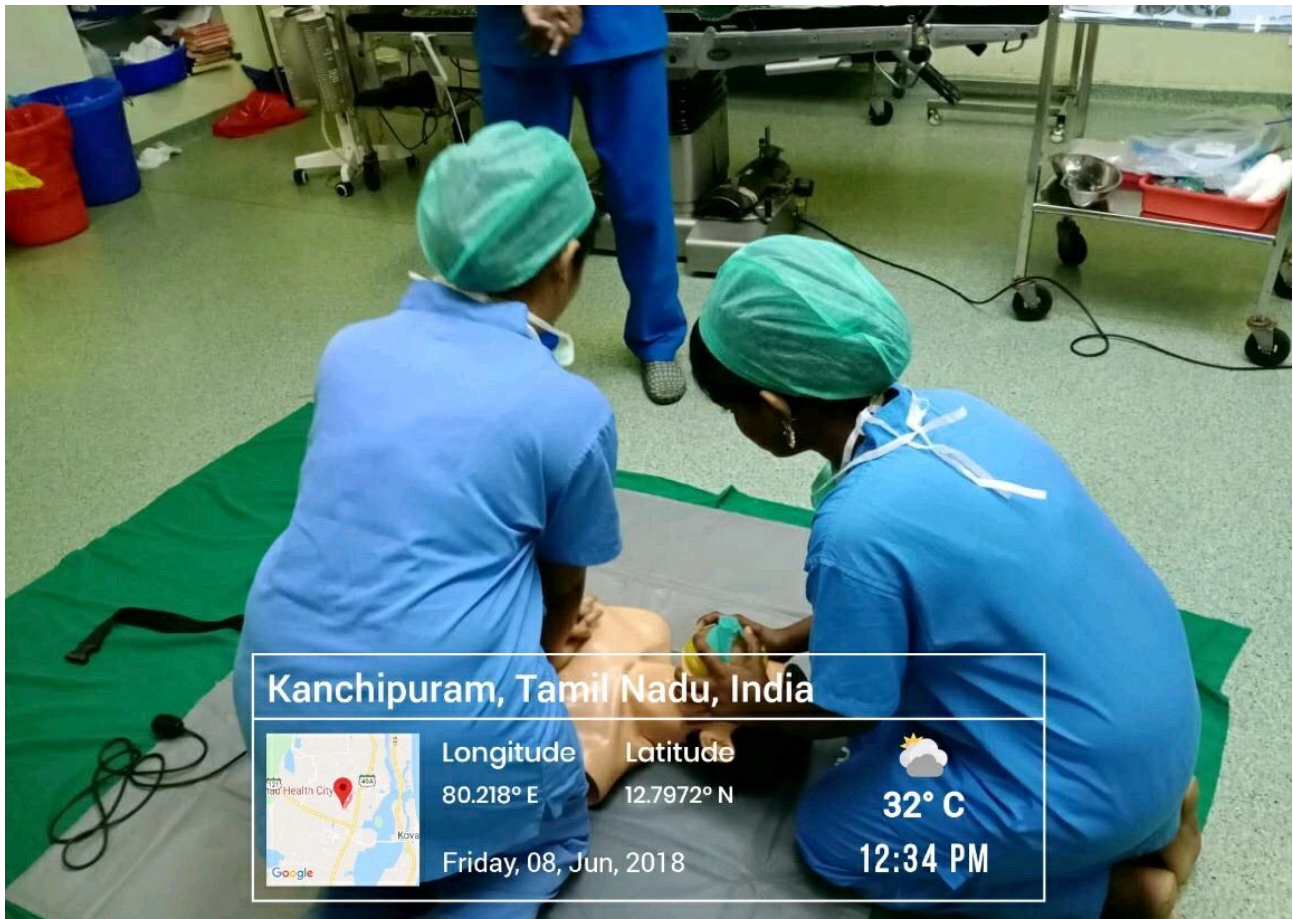

No. of students: 60

Summary:

Basic Life Support (BLS) training helps students to recognise life-threatening emergencies and perform CPR. The students were taught Basic Life Support by the instructions given audiovisual sources. The students were then divided into groups for the hand on program. The demonstrations were performed on a manikin by the instructor. All the students performed the skills on the manikin and exchanged roles of the resuscitator. The students were exposed to knowledge and skills in cardiopulmonary resuscitation (CPR) and were assessed on the skills learnt at the end of the training session.

Outcome:

Understanding and clinical application on how to provide rescue breathing and cardiopulmonary resuscitation in an emergency medical situation.

LASERS

Date : 23.01.2019

Time: 8.30 AM - 3.30 PM

Venue: 375 Auditorium

Department: Periodontics

No. of students: 89

Summary:

Laser dentistry is an upcoming field of dentistry that has the advantage to treat a number of different dental conditions over conventional methods. The students enrolled were exposed to lectures and hands on training on using the soft tissue laser. The lectures included basic scientific principles involved with laser dentistry; the safety concerns associated with laser utilization, the potential uses of a laser, safety and effectiveness of clinical procedures in the dental practice and provided hands on experience using one or more lasers. The students were divided into batches and taught the equipment basics, modes and application on animal models.

Outcome:

The students learnt the application and use of laser-assisted clinical procedures in dentistry.

BASICS OF ORAL IMPLANTOLOGY

Date : 08.02.2019-09.02.2019

Time: 9.00 AM - 4.00 PM

Venue: 375 Auditorium

Department: Prosthodontics

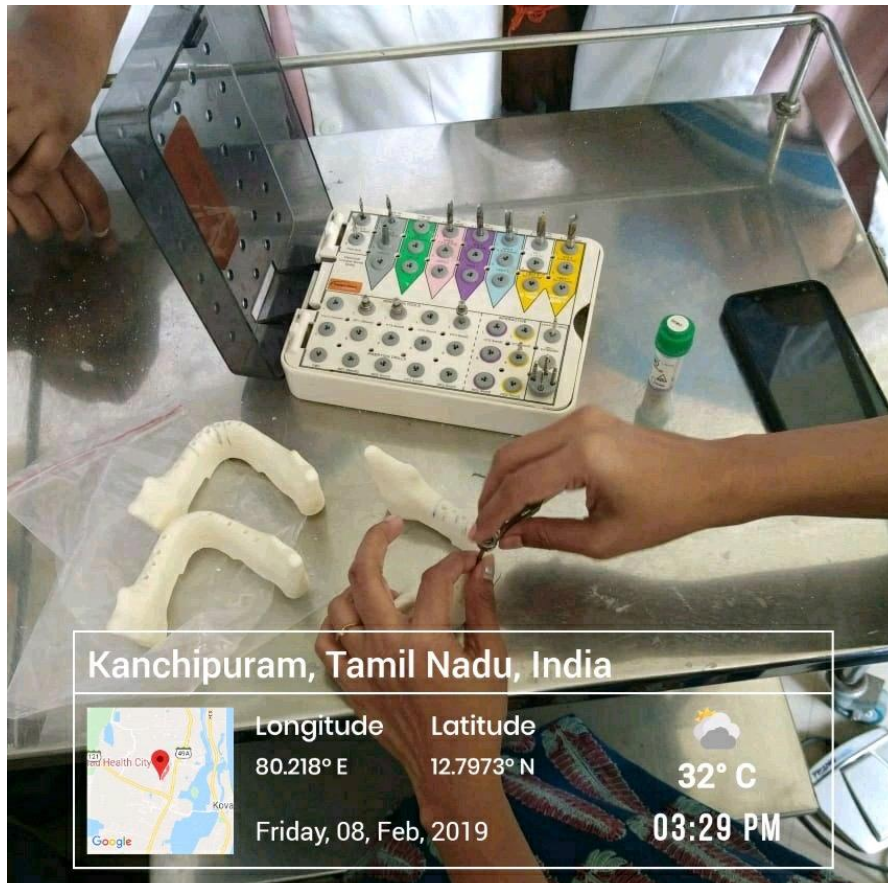

No. of students: 128

Summary:

Dental implants provide completely edentulous and partial edentulous patients the function and aesthetics they had with natural dentition. It is critical to understand and apply predictable surgical principles when treatment planning and surgically restoring edentulous spaces with implants. Here the students were taught the basics of implants, concepts to be followed for predictable results when treating and restoring dental implants. They were exposed to the biologic and functional considerations, preoperative assessments, radiographic examinations, contraindications, general treatment planning, implant surgery and prosthetic phase. The students had hands on exercise with step by step guide on implant placement on 3D printed mock up models of mandible.

Outcome:

Implant case selection and placement in patients as a permanent functional rehabilitation of edentulous and partially edentulous space.

BASIC LIFE SUPPORT

Date : 27.04.2019

Time: 10:00- 11:00 AM

Venue: Skills Lab

Department : Oral Surgery

No. of students: 48

Summary:

All the interns were taught Basic Life Support (BLS) by hands-on skills sessions using eSimulations by audiovisual sources, self-directed learning and various interactive activities. The instructions were given by video and slide presentation. The students were then divided into groups for the hand on program. The demonstrations were performed on a manikin by the instructor. All the students performed the skills on the manikin and exchanged roles of the resuscitator. The students were exposed to knowledge and skills in cardiopulmonary resuscitation (CPR), using AMBU Bag, automated external defibrillators (AED) and relieving airway obstructions in patients of every age.

Outcome:

The students learnt how to recognize a life-threatening emergency, treat choking or airway obstruction, and provide rescue breathing, cardiopulmonary resuscitation in an emergency medical situation.

DENTAL LAMINATES

Date : 19.08.2019

Time: 9.00 AM - 4.00 PM

Venue: Department of Prosthodontics
and Phantom Head Lab

Department: Prosthodontics

No. of students: 21

Summary:

Dental laminates veneers offers conservative aesthetic management of unaesthetic anterior teeth. With the evolution of materials, ceramics and adhesive systems students should understand the latest ceramic materials to recommend them to the patient and have thorough knowledge on its application and technique. The students were given an insight on the need for laminates, indications and contraindications, tooth preparation techniques, impression making and cementation. They were also guided hands on and assessed on their learning of preparation required for laminates.

Outcome:

Students learnt the art of tooth preparation, case selection and dental application of laminates for successful completion of anterior aesthetic rehabilitation cases in smile designing.

ANIMAL HOUSE ACTIVITIES

Date: 06.12.2014

Time: 2:00-3:00 PM

Venue: Animal House, CDCRI

Coordinator: Dr. Sobita and Dr. Ezhil

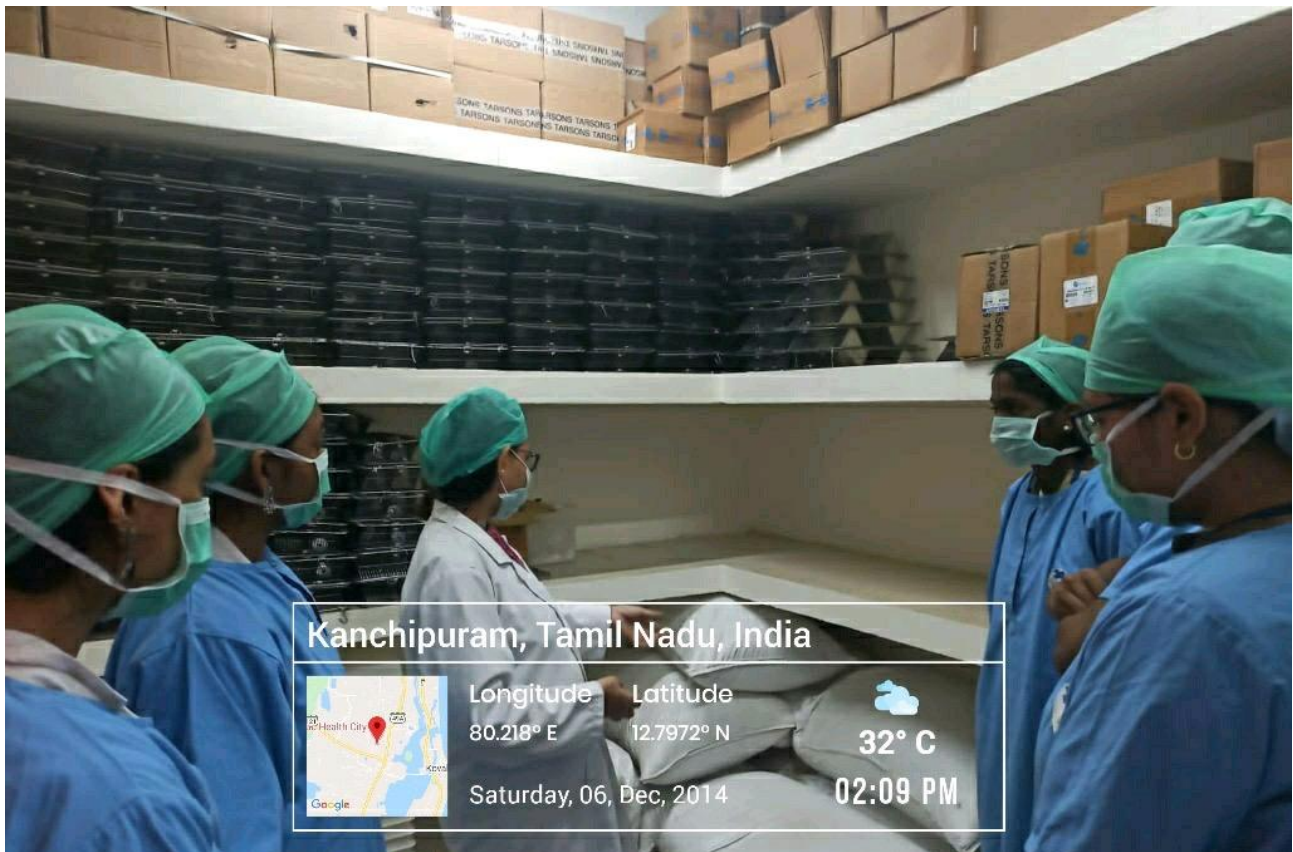

No. of students: 63

Summary:

Chettinad Dental College & Research Institute has an animal house which is a CPCSEA approved facility with animals maintained hygienic and under controlled environmental conditions. The second year students were exposed to the labs, animal area and rat rooms, quarantine section, store room and surgical room. A variety of animals inclusive of swiss albino mice, balb/c mice, wistar albino rats and rabbits used for research were shown to the students. The students were taught that these animal model or studies were not only used to study human diseases, but also to gain knowledge of biological responses and to evaluate the safety and efficacy of various artificial and biological compounds and devices.

Outcome:

Knowledge of various types of animals and their application for research studies.

ANIMAL HOUSE ACTIVITIES

Date: 05.12.2015

Time: 2:00-3:00 PM

Venue: Animal House, CDCRI

Coordinator: Dr. Sobita and Dr. Sarita

No. of students: 42

Summary:

Chettinad Dental College & Research Institute has an animal house which is a CPCSEA approved facility with animals maintained hygienic and under controlled environmental conditions. The second year students were exposed to the labs, animal area and rat rooms, quarantine section, store room and surgical room. A variety of animals inclusive of swiss albino mice, balb/c mice, wistar albino rats and rabbits used for research were shown to the students. The students were discussed on the dental application of animal studies in areas of dental materials, surgery, anaesthesiology and implantology.

Outcome:

Understanding to basics of experimental research in dentistry on animal models.

ANIMAL HOUSE ACTIVITIES

Date: 26.11.2016

Time: 3:00-4:00 PM

Venue: Animal House, CDCRI

Coordinator: Dr. Sobita and Dr. Sarita

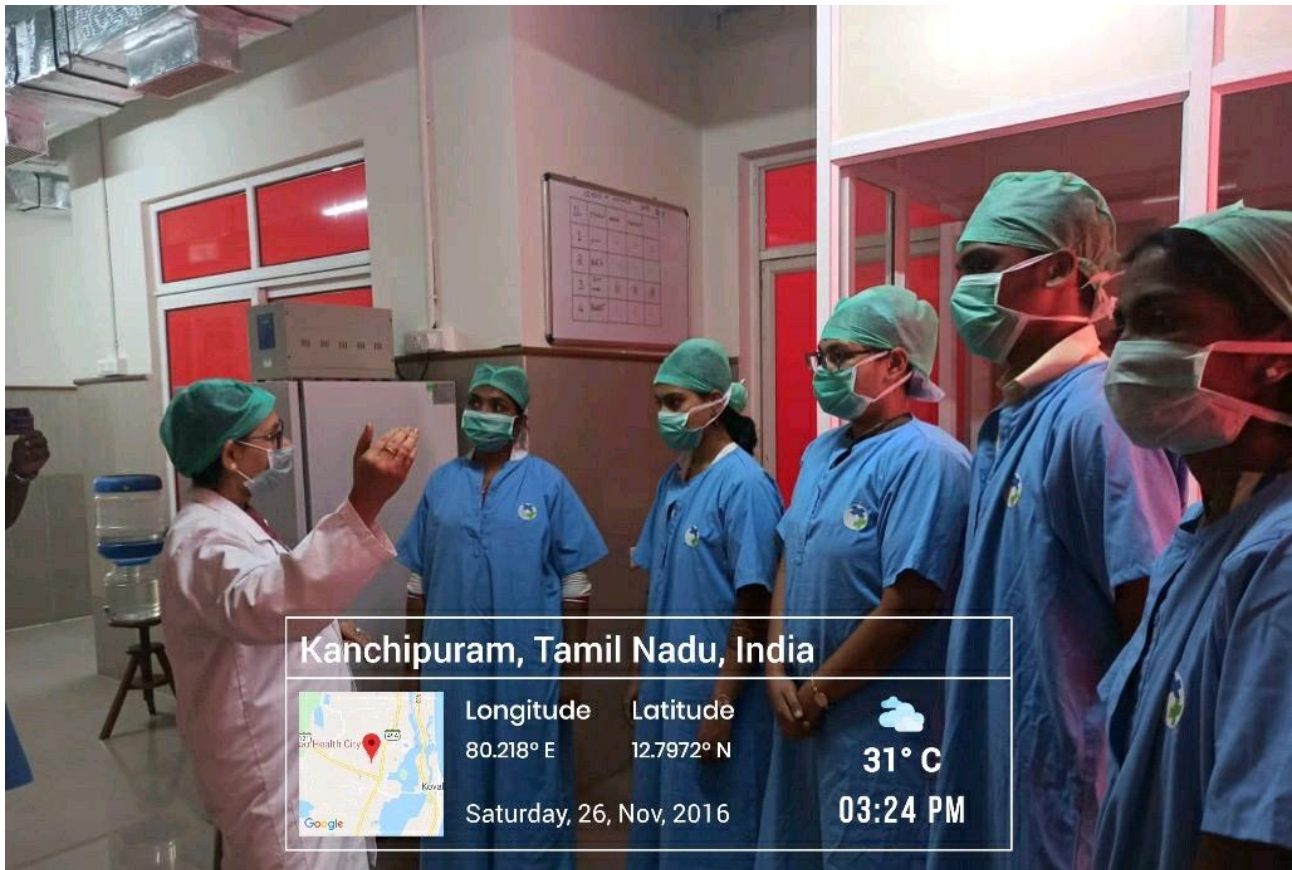

No. of students: 77

Summary:

The animal house in Chettinad Dental College & Research Institute is a CPCSEA-approved facility with animals maintained under hygienic and controlled environmental conditions. It aids in training and research activities. The second year students were exposed to all the variety of animals inclusive of swiss albino mice, balb/c mice, wistar albino rats and rabbits used for research. The students were explained on the ongoing research in the facility and the possible projects that could be done using animals. A need for justification of choice of the animal model namely, species, number of animals used, randomization method and statistical analysis for the experimental study was discussed.

Outcome:

Insights into the fundamental concept, knowledge, and application of lab animals in research.

ANIMAL HOUSE ACTIVITIES

Date: 02.12.2017

Time: 2:00-3:00 PM

Venue: Animal House, CDCRI

Coordinator: Dr. Sobita and Dr. Sarita

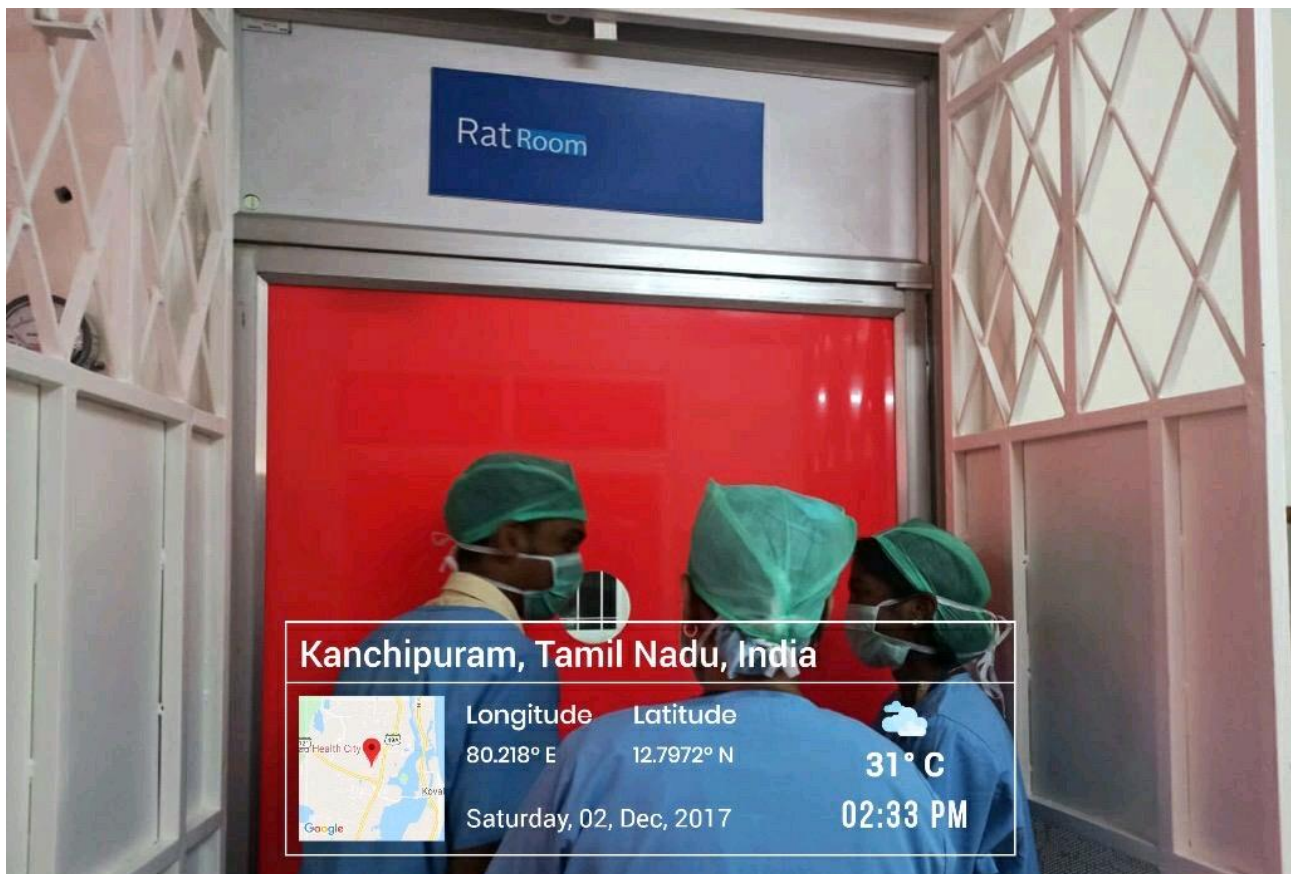

No. of students: 78

Summary:

The Chettinad Dental College & Research Institute has an established animal house for teaching, training and research activities for students. The facility is CPCSEA approved with an animal area and rat rooms, quarantine section, store room and surgical and experimental room. The students were exposed to animals species inclusive of swiss albino mice, balb/c mice, wistar albino rats and rabbits maintained under hygienic and controlled environmental conditions. Students learnt the need for different animals for different types of research like rodent species for caries and dental plaque studies. The application of animal studies in various fields of dentistry like bone healing, dental caries, dental materials, growth studies, oral cancer, oral mucosa and periodontal diseases were discussed.

Outcome:

The students gained insight on the application of animal models in dentistry including knowledge on disease pathology and newer treatment approaches to prevent the dental diseases at an earlier stage.

ANIMAL HOUSE ACTIVITIES

Date: 15.12.2018

Time: 2:00-3:00 PM

Venue: Animal House, CDCRI

Coordinator: Dr. Sobita and Dr. Sreeram

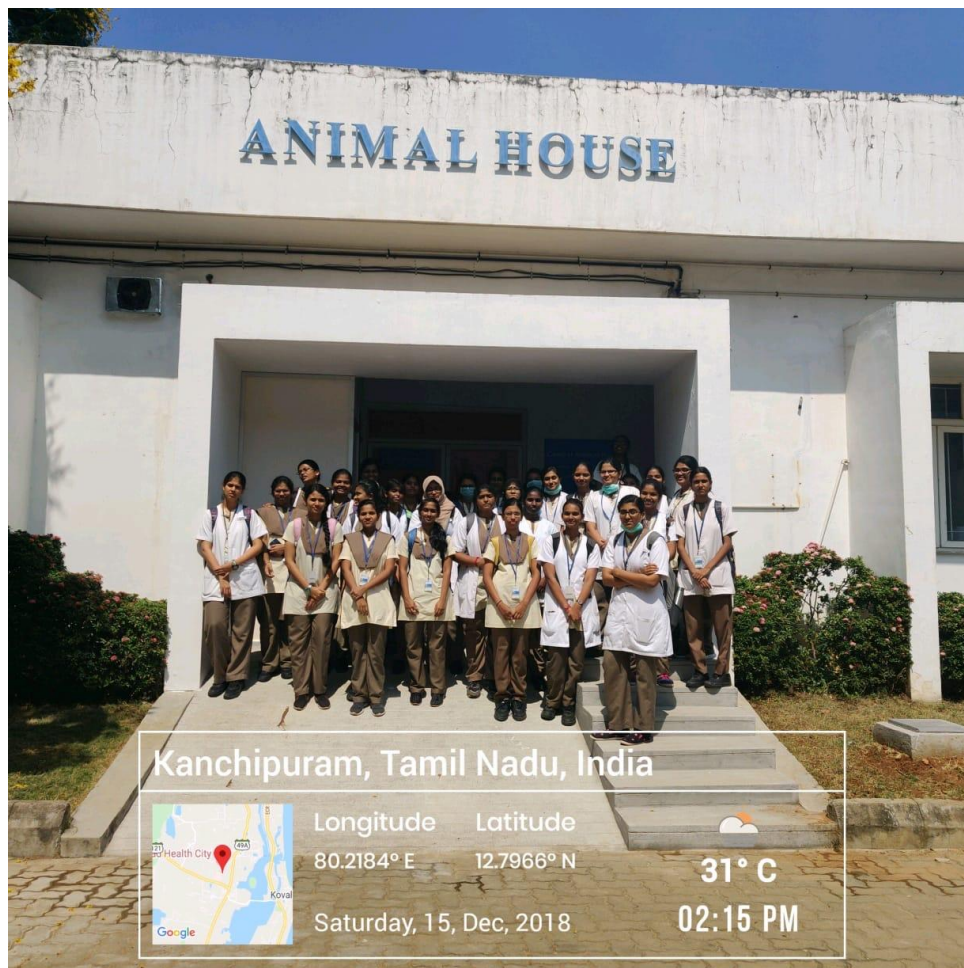

No. of students: 78

Summary:

The animal house at Chettinad Dental College & Research Institute was established for teaching, training and research activities for students. The facility is CPCSEA approved with an animal area and rat rooms, quarantine section, store room and surgical and experimental room. The students were exposed to animals species inclusive of swiss albino mice, balb/c mice, wistar albino rats and rabbits maintained under hygienic and controlled environmental conditions. The application of animal studies in various fields of dentistry like dental material effects, periodontal disease, implant, bone reconstruction, distraction osteogenesis and advanced surgical experiments were discussed. Students learnt the need for translational research in animals prior to human studies.

Outcome:

Knowledge and application of animal experiments for research and further development of randomised control trials in humans.

HERBAL GARDEN ACTIVITIES

Date: 06.12.2014

Time: 3:00-4:00 PM

Venue: Herbal Garden, CDCRI

Coordinator: Mr.Ragulan & Dr. Ezhil

No. of students: 63

Summary:

The Herbal Garden at Chettinad Dental College & Research Institute has a wide variety of medicinal plants. The second year students were shown the various plants in the herbal garden. The students were explained the benefits of plant extracts and uses of the various species of plants grown in the garden. The students were explained on the use of secondary metabolites of plants used for therapeutic purpose. This alternative medicine uses herbs to provide the least side effects and high efficiency and hence used for improvement of oral health and dental hygiene.

Outcome:

Understanding of herbs application in primary health care related to dentistry

HERBAL GARDEN ACTIVITIES

Date: 05.12.2015

Time: 3:00-4:00 PM

Venue: Herbal Garden, CDCRI

Coordinator: Mr.Ragulan & Dr. Sarita

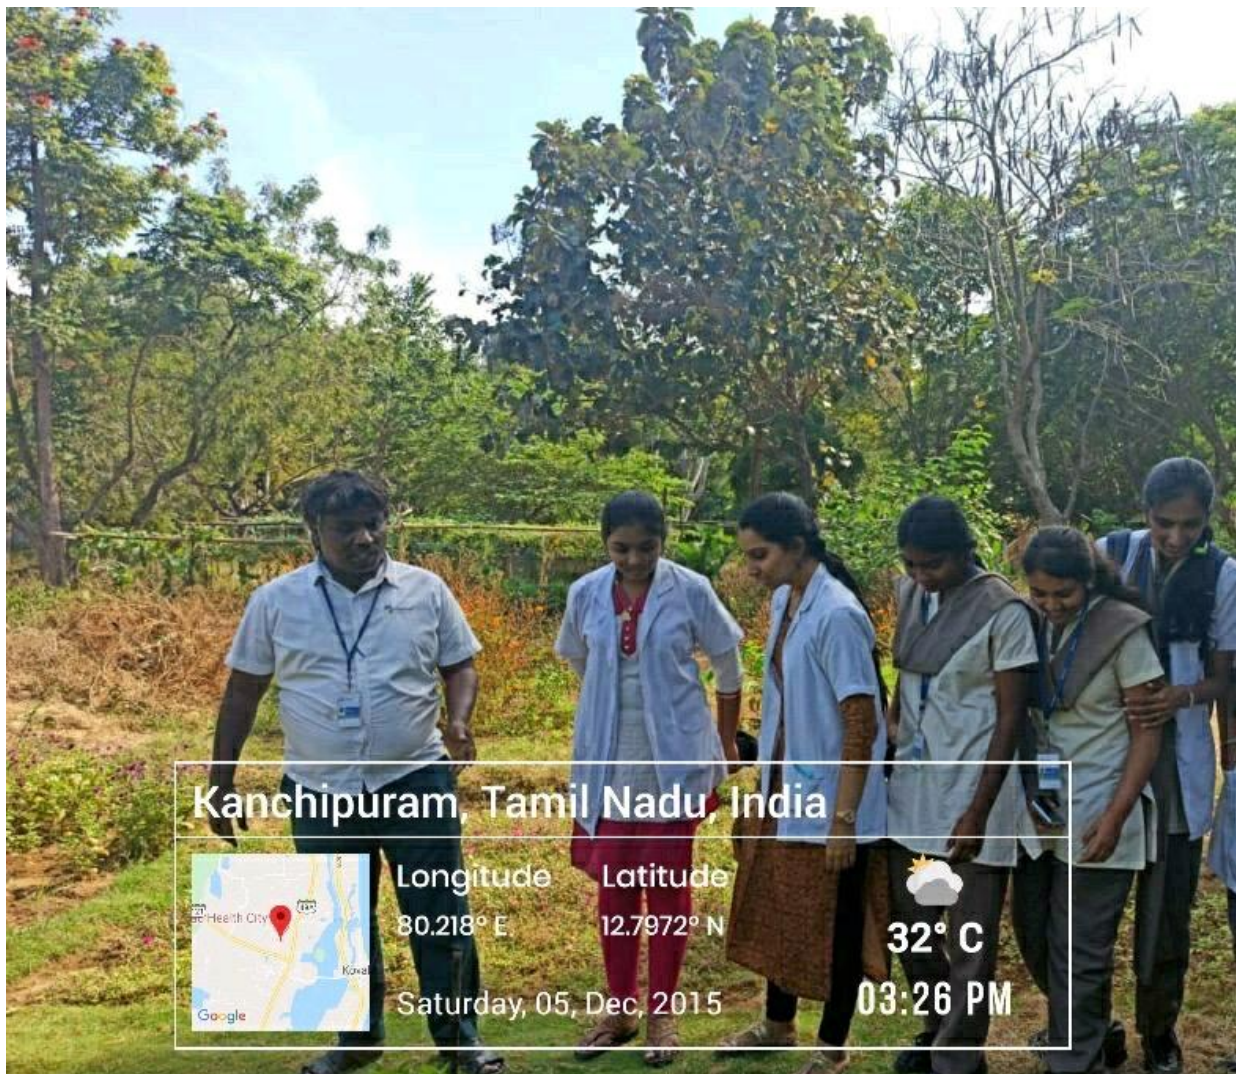

No. of students: 42

Summary:

The Herbal Garden at Chettinad Dental College & Research Institute includes different varieties of medicinal plants including rare species. The second year students were shown the various plants in the herbal garden with medicinal properties. The students were explained the benefits and uses of the various species of plants grown in the garden. These plant extracts, essential oils & purified phytochemicals have the potential to be developed into agents that can be used as preventive or curative agents for dental diseases .

Outcome:

Knowledge on herbal plants use as therapeutic agent in relation to dentistry and for dental health education programmes.

HERBAL GARDEN ACTIVITIES

Date: 26.11.2016

Time: 2:00-3:00 PM

Venue: Herbal Garden, CDCRI

Coordinator: Mr.Ragulan & Dr. Sarita

No. of students: 77

Summary:

The Herbal Garden at Chettinad Dental College & Research Institute includes different varieties of medicinal plants including rare species. The second year students were explained the benefits and uses of the various species of plants grown in the garden. The extracts from these herbs could be used in dentistry as an antioxidant, antimicrobial, antiseptics and antibacterial. These herbal gardens aid in promotion of medicinal plants in dentistry due to its ease of availability, reduced cost, reduced side effects and antimicrobial resistance compared to conventional treatment.

Outcome:

Students gained information on plants as alternative medicine that could be used in research in relation to dentistry.

HERBAL GARDEN ACTIVITIES

Date: 02.12.2017

Time: 2:00-3:00 PM

Venue: Herbal Garden, CDCRI

Coordinator: Mr.Ragulan & Dr. Sarita

No. of students: 78

Summary:

The Herbal Garden at Chettinad Dental College & Research Institute includes different varieties of medicinal plants including rare species. The students were shown range of herbs and drugs made of them aimed at treating specific diseases of mouth cavity. The students were explained the benefits and uses of the various species of plants grown in the garden. These plants contain active ingredients against dental organisms. The natural phytochemicals is an effective alternative to antibiotics and represent a promising approach in prevention and therapeutic strategies for dental caries and other oral infections. Their use in formulation of chewing sticks, tooth brushes, oral rinses, tooth pastes and chewing gums.

Outcome:

Knowledge on herbal plants that could be used in research in relation to dentistry.

HERBAL GARDEN ACTIVITIES

Date: 07.07.2018

Time: 2:00-3:00 PM

Venue: Herbal Garden, CDCRI

Coordinator: Mr.Ragulan & Dr.Rajesh

No. of students: 38

Summary:

The Herbal Garden at Chettinad Dental College & Research Institute includes different varieties of medicinal plants including rare species. The students were shown a variety of medicinal and aromatic plants in the herbal garden as a part of their academic activity. They also were told about the herbal garden being the resource to prepare a variety of medicinal products. They were enriched with an hands on experience about the medicinal value of plants including growing and extracting the medicinal ingredients from these medicinal plants. They were taught about the herbs with antimicrobial, anti-inflammatory, antiplaque, astringent and antioxidant properties, that could be used in management of periodontal disease and prevent halitosis. They also are used in research for pulp capping, as an irrigating solution, intracanal medicament, mouth rinses and herbal dentifrices.

Outcome:

Comprehensive understanding on use of medicinal herbs for dental diseases.

HERBAL GARDEN ACTIVITIES

Date: 15.12.2018

Time: 2:00-3:00 PM

Venue: Herbal Garden, CDCRI

Coordinator: Mr.Ragulan & Dr.Sreeram

No. of students: 78

Summary:

Herbal plants have been used in dentistry for its therapeutic effects. The Herbal Garden at Chettinad Dental College & Research Institute includes different varieties of medicinal plants including rare species. The second year students were shown the various plants in the herbal garden. They learnt the type of plant, cultivation and preservation of medicinal plants. They also were told about the herbal garden being the resource to prepare a variety of medicinal products. They were enriched with an hands on experience about the medicinal value of plants including growing and extracting the medicinal ingredients from these medicinal plants. These herbs could be used for its anti-inflammatory, antibacterial and antifungal activity as an adjunct in dental treatment.

Outcome:

Herbal garden as a source of medicinal herbs for phytodentistry.

DETAILED REPORT OF ACTIVITIES AND LIST OF STUDENTS BENEFITTED DUE TO EXPOSURE TO LEARNING RESOURCE

LABORATORIES, ANIMAL HOUSE AND HERBAL GARDEN AS LEARNING RESOURCE

Chettinad Dental College and Research Institute has contemporary laboratories where students can observe, learn and practice various simulation and mock activities. The students apply the theoretical concepts in the laboratories and learn the applied aspects step-by-step. This exposure to hands-on-practical training help develop their practical competence in various fields of dentistry and allied sciences.

FIRST YEAR

PHYSIOLOGY

The undergraduate students utilize the sphygmomanometer apparatus for measuring the blood pressure. The students also use the hemoglobinometer for estimation of hemoglobin levels in blood and compound microscope for analysis of peripheral smear and total count.

BIOCHEMISTRY

Analysis of serum and urine glucose, albumin, ketone bodies, bile salts and pigments is done using test tubes and pipettes.

HUMAN ANATOMY AND EMBRYOLOGY

Section of fixed normal human tissues are studied using compound microscope.

ORAL HISTOLOGY AND TOOTH MORPHOLOGY

Sections of fixed normal oral human tissues are studied using compound microscope. Teeth sectioning and tissue sectioning is done by students using Arkansas stone and lab microtome respectively.

SECOND YEAR

GENERAL PATHOLOGY

Sections of fixed pathological human tissues are studied using compound microscope.

MICROBIOLOGY

Stained peripheral smears of microorganism are studied using compound microscope.

DENTAL MATERIALS

The students learn manipulation of cement mixing and preclinical cavity preparation on plaster models.

Chettinad

Dental College & Research Institute

PRECLINICAL PROSTHODONTICS

The undergraduate students learn step by step teeth setting and processing of removable and complete dentures.

PRECLINICAL CONSERVATIVE DENTISTRY AND ENDODONTICS

The preclinical phantom lab with airtor and micromotor facilities are used for cavity preparation and restoration on simulated typhodont jaw sets by the undergraduate students.

ANIMAL HOUSE

The students are exposed to the various animals like swiss albino mice, balb/c mice, vistar albino rats and rabbits that used for research in relation to dentistry in the animal house.

HERBAL GARDEN

The students are exposed to various medicinal plants at the herbal garden for various research activities in primary health care in dentistry.

THIRD YEAR

ORAL PATHOLOGY AND MICROBIOLOGY

Sections of fixed pathological oral human tissues are studied using compound microscope

FINAL YEAR

ORAL MEDICINE AND RADIOLOGY

The Department of Oral Medicine and Radiology has a AERB certified Radiographic room along with Dark room of 600 sq. ft with equipment's necessary for basic UG and PG learning .Punch biopsy tool, Biopsy equipment, Extra oral cassettes with intensifying screens, Dark room with safe light facility, Automatic radiographic film processors, Radiographic film, storage lead containers are advanced equipment's available for patient care, research and teaching and learning.

ORAL MAXILLOFACIAL SURGERY

The undergraduate skills lab is used for demonstration of Basic Life Support (BLS) using life like mannequins and enabling students to practice the same using A.V aids on the mannequins. Demonstration of choking and resuscitation in infant mannequins. The postgraduate students use the skills lab for demonstration and practice of IM/IV Canula and withdrawal of blood, airway maintenance by nasoendotracheal intubation, auscultation after the intubation and BLS practice on mannequins with audio visual simulation.

DEPARTMENT OF PEDIATRIC AND PREVENTIVE DENTISTRY

The Department of Pedodontics has the state-of-the-art equipments used for extensive clinical and laboratory purposes. The undergraduate students use the digital x-ray system, radiovisography for diagnostic x-rays.

Chettinad

Dental College & Research Institute

Any intraoral periapical radiographs are viewed and studied using the x-ray viewer. The postgraduate students utilize the dispenser for dispensing dental plaster and dental stone for fabrication of study models. The vibrator is used for pouring the impressions and moulds for preclinical exercises. The trimming machine helps the dental cast to be trimmed to perfection. The Lathe is used to trim, finish and polish oral appliances. The acryliser or dewaxing unit is used in the fabrication of functional space maintainer and removable partial dentures. The phantom head along with the typhodont jaw sets aids in simulation of patient for the students. The hand files are sterilized using the glass bead sterilizer. Ultrasonic cleaner is used to clean the instruments before sterilization and the needle destroyer aids in safe disposal of the used needles. The micromotor handpiece with trimmers and spot welders are used in stainless steel crown and band pinching procedure. The hydro solder and soldering torch offer precise soldering for space maintainers. The vacuum formed pressure molding machine is used for fabrication of splints for trauma, bruxism and orthodontic retainers.

DEPARTMENT OF PROSTHODONTICS

The Department of prosthodontics, crown and bridge and implantology is one of the basic departments of dentistry and houses many laboratory instruments and equipments. The undergraduate students have a separate lab in the department itself which is equipped with micro motors, model trimmers, acrylizers, bench press etc., which are required during clinical work on patients. The post graduates are trained to handle advanced equipment in making ceramic restorations, and casting metals for making prosthesis. For this purpose the lab has a cobalt chromium lab (casting lab) which is equipped with an induction casting machine, burn out furnaces, high speed lathes, sand blaster etc. which are essential for metal trimming and polishing. For ceramic work we have an advanced lab with ceramic furnaces, steam cleaner etc., which aid in fabrication of ceramic fixed partial dentures.

DEPARTMENT OF ORTHODONTICS AND DENTOFACIAL ORTHOPEDICS

The department has the following equipments for postgraduate and under graduate students learning, patient care and Research. Anatomical Articulator with face bow attachments are used to transfer Facebow, more accurately earbow records are used to transfer the spatial relationship of the maxillary cast and an arbitrary hinge axis to an articulator. Hydrosoldering Unit is perfect for soldering and brazing in the orthodontic laboratory environment. Electropolisher is used to polish, passivate, and deburr metal parts and improves the surface finish. Sets of Orthodontic Pliers used for treating patients with conventional orthodontic treatment. Orthodontic Impression trays High intensity Light curing unit has reduced curing times offer advantages for the orthodontist and for the patient Computer softwares-Facad is a software program used for orthodontic tracing, cephalometric analysis, and visual diagnostic imaging, as well as for treatment planning with soft tissue profile prediction for both orthodontics and maxillo-facial surgery.

Chettinad

Dental College & Research Institute

ORAL AND MAXILLOFACIAL PATHOLOGY

The Department of Oral and Maxillofacial Pathology forms the backbone of teaching, diagnostic and research unit of Chettinad Dental College & Research Institute. The Department supports nine clinical specialties of dentistry by providing clinical & histopathological diagnosis. The department is located in the second and fourth floor of Chettinad Dental College & Research Institute. The Department in the second floor is dedicated for undergraduate teaching and spread over an area of 10000 sq ft. It harbors the tooth morphology lab, Oral Pathology lab, staff cubicles, museum and histopathology lab. The infrastructure includes laboratory work tables, models, posters and diagram charts catering the various teaching methods. Monocular microscopes are used for UG students for viewing slides, ground sections and decalcified sections. Museum with teaching specimens (hard and soft tissue) and casts demonstrates various pathologies. The department in the fourth floor for postgraduates is vast measuring about 10500 sq ft. and contains lab, seminar room, library, hematology, immunohistochemistry and clinic designed for PG training. Facilities for viewing slides with Binocular microscopes and Pentahed microscope are available for PG students. A fully equipped histopathology lab hematology lab and immunohistochemistry lab cater to patient care and research purposes.

DEPARTMENT OF CONSERVATIVE DENTISTRY & ENDODONTICS

The Department of conservative dentistry has got the state of art lab equipments catering to the need of patients as well as the academic needs of UG ,PG students. The lab situated in fourth floor ,E block manned by experienced technical personnel and is divided for metal casting work and a separate ceramic lab with two ceramic furnaces. Metal casting done by induction casting machine and for the benefit of UG students 3 centrifugal casting machines also available. For doing composite work ,indirect composite curing unit also available .For putting dies the whole range of pindex system available and for finishing and polishing high speed lathes ,micromotors and other equipments for finishing available In addition to that adequate numbers of sand blasting machines also present .
