1st November, 2018

LIBRARY ORIENTATION PROGRAMME

First year B.D.S

2018-2019

Date : 1st November, 2018

Time: 9:30 am to 10:30 am

Venue: Central Library

Coordinators: Dr.Anitha, Dr.Divya, Dr. Aishwarya

A Library orientation programme was organised for the first year B.D.S students for the academic session of 2018-2019. The following points discussed with the students,

1. The students were shown access to central library and the rules and regulations were thoroughly discussed.
2. All the students will be monitored through biometric in and out punch and through manual entry in the register provided
3. Students were shown the dental books collection and basic science books covering all the departments and reference books.
4. Students issuing books should bring their respective ID cards and are prohibited from damaging the books, defacing the pages of library book in ink or pencil. If found, fine will be levied on the perpetrator. Books can be renewed for another two weeks and any overdue or loss of book will be fined.
5. The log entry for taking books for reading in the library was shown.
6. The journals sections including current and back volumes for reference were shown.
7. The display rack of newspapers and magazines for general information and knowledge were shown.
8. The reprographic room where the students can make copies of selected pages of books or journal articles for reference and take print outs of online references.
9. Virtual Library should be used for LMS and educational purpose only.
10. The login access to electronic databases provided by The Tamil Nadu Dr. M.G.R University using their respective login and password via

Message

Dear Colleagues & Students,

It is my proud and privilege to invite you all to this Library e-Consortium, which has been formulated with a view to connect all the

Mission Statement

To achieve and maintain uniformly high standards of needs-responsive medical education in the State of Tamilnadu.

To create personnel for health manpower who will be endowed with a sense of dedication and a spirit of enquiry and will contribute substantially to the Alma Ata goals of health for all by 2020 A.D.

d. A login page opens where the username and password has to be entered

தமிழ்நாடு டாக்டர் எம்.ஜி.ஆர். மருத்துவப் பல்கலைக்கழகம்
The Tamil Nadu Dr. M.G.R. Medical University

The Tamilnadu Dr. M.G.R. Medical University, Chennai has started a Library e-Consortium connecting the Government and Private Medical, Dental, Pharmacy and Nursing institutions.

The major goal of the Library consortia is to provide interactive information services to the faculties and students. Accessing information resources and services through one unified portal would help the affiliated institutions' libraries to eliminate the overlap and duplication of resources and efforts, which would facilitate optimum methods for effectively and efficiently using the allocated resources.

The e-Consortium provides access to more number of electronic resources at substantially lower cost; thus sharing the resources enables to increase quality of services.

For any other queries, kindly e-mail to library@tnmgrmu.ac.in University Library Contact No. 044 - 2235 4403

Abstract Translate

Disable Math Jax

Objective: The aim of this study was to evaluate wound biomodification by assessing antimicrobial properties present within a human-derived composite amnion chorion membrane (ACM). **Methods:** Membranes analyzed were the human-derived ACM BioXclude™ and the porcine-derived collagen membrane Bio-Gide®. Paper discs with and without tetracycline served as positive and negative controls, respectively. The same number of colony-forming units per milliliter for each bacterial species (*Aggregatibacter actinomycetemcomitans*, *Streptococcus mutans*, and *Streptococcus oralis*) was inoculated on each of the discs. Discs from each group were removed at 12 and 24 hours and sonicated to remove the bacteria off the membranes. A serial dilution was performed to quantify bacterial growth. **Results:** The ACM inhibited growth at all time points, with all bacterial strains, identical to the negative control tetracycline discs. The collagen membrane and positive controls did not inhibit growth of any of the bacterial species throughout the 24-hour study period. $P < 0.05$ for microbial growth on ACM or negative control vs. either collagen membrane or positive control. **Conclusion:** ACM was proven to be as bactericidal as paper discs inoculated with tetracycline at its minimum.

Description
Lasers have become an increasingly useful tool in conventional dental practice. Their precision and less invasive quality make them an attractive technology in esthetic and pediatric dentistry, oral medicine, and a range of other dental procedures. Lasers in Dentistry: Guide for Clinical Practice is a comprehensive, yet concise, text that provides a practical approach to the use of lasers in dentistry.
