

REMEDIAL COACHING

REPORT 2014-19

Summary

Experience reveals that student learners, being promoted from one year to another are sometimes found to be behind the expected level of achievement required to keep pace with the secondary stage studies. Consequently, the problem of non achievement in different terminal examinations has become very acute. So the need for remedial teaching in every year is being seriously conceived upon.

This has been followed from the year 2007, wherein all year in charges/Department identifies the slow learners and following a remedial class for them. Additional hour of teaching schedule in every Department and more simplified method of teaching would be adopted by the departments for easy of understanding of the subject. Peer group studies are also promoted by the faculties for ease of study environment. The faculty also motivates the student and boosts the self-confidence to have a better outcome.
