1. INTRODUCTION

NATIONAL TOOTH FAIRY DAY

February 28th, National Tooth Fairy Day, encourages us to take a look back on the history of one of dental care's little helpers. It's one way our children develop good dental hygiene.

In the mid-1920s, fairies were used for all sorts of health education, from bath

fairies to fresh air fairies as a way to get kids to remember to eat their vegetables, wash behind their ears and get a good night's rest. Like toothpaste today advertises fruity flavors and sparkles to get kids excited to brush their teeth, in 1925, it was probably quite a bit more difficult considering the pastes were mostly peroxide and baking soda. One advertisement was for a Fairy Wand Tooth Whitener. This product promised to brush away cigarette and coffee stains. The ad was aimed at both children and adults, we hope!

What happens when we act?

Taking care of ones oral health makes life easier in future. By creating an awareness in the right time and right age makes things fall in place more accurately

There will be a lesser amount of last stage treatments for the disorder in pediatrics. Thus, making them have a better exposure to oral health.

Progress:

We have gained a clear cut image on “ Why oral health care is important for pediatrics “

By which we are able to educate the parents of the pediatrics on the right direction and making it easy for the kids.

The more we know, the more progress we can make in reducing the effects, increasing prevention and, treatment and care.

Impact

We were able to communicate in a well mannered way, We were asked on the effects and results and two of the kids parents wanted to get treated at the Chettinad dental college and research institute. Op no -

Change

Through raising the public and political literacy and understanding around oral health care, we reduce improper food intake, cause and effects and misconceptions can change behavior and attitude of the oral hygiene of pediatrics

2. PREPARATIONS FOR THE SPECIAL EVENT

- The Invitation was made by Dharshini P and presented to the Head of the Department of Public Health Dentistry, Dr. Jagannatha G V for the special event

- The Invitation was made by Dharshini P and presented to the Head of the Department of Pediatrics for the special event

2.04Anu Chandhini: made a chart work on Adulting and oral care for Pediatrics from the parents point of view Do's and Don't

- 2.09 Barath and Dharshini: made a explosion box on the causes effects and treatment plan in a cumulative manner there by making it innovative and interesting for the kids

2.10 Oral hygiene in kids

Deepthika.B explain it in a clock formate making it interesting for the kids to grab attention and pay interest .

- Bency, Pranathi , deepthika,Dharshini: made flash cards ,balloons and flash cards for “ brush ,brush “ song and was sung by the whole of b batch

4. CONCLUSION

National tooth fairy day event by the Final Year B Batch students concluded with a thankyou addressal showing sincere gratitude towards the Department of Public Health Dentistry and the Head Of the Department and the staff for the opportunity and continuous support and motivation throughout the event.

LEARNING HIGHLIGHTS FROM THE EVENT:

Differing from our previous special events, this direct event to the general public was a new experience. Talking to patients one on one, building up conversations on the spot and adapting ourselves to meet the needs of our audience was a whole new challenge on its own. The active engagement and participation of the public, gave us a morale boost which aided us in giving our best.

We learned how to connect with the audience, not just with our verbal skills but also use our gestures, body language and facial expressions to communicate in a more efficient way.

We also learned the need for cooperation and team work in successfully hosting a special event.

We also developed our interpersonal skills by answering their questions and concerns about the particular topic.

We learnt that spreading awareness to the general public makes an impact and we feel beyond blessed to be given this opportunity.

AREAS OF IMPROVEMENT:

We would like to improvise on our stage presence and we also would like to improvise our speech delivery to the general public in a still more systematic and effective manner.

In our upcoming events we would also like to incorporate an innovative methodology to educate the public apart from the conventional model and chart works.

5. APPENDIX- LIST OF PARTICIPANTS

Faculty present:

- Dr. Jagannatha GV sir
- Dr. Nagaland T sir
- Dr. Nagappan N sir
- Dr. Cyril Benedict sir

PG present:

1. Dr. Sujatha Devi
2. Dr. Vincy Preetha
3. Dr. Charumati

Final Year Students- B Batch:

1. Anu Chandhini
2. Anu Dharshini
3. Anusha Naidu
4. Ashrita
5. Barath Kumar
6. Bency
7. Buveshwari
8. Chitaluru Pranathi
9. Deepthika
10. Dharshini
