NATIONAL DENTIST DAY - 2021

Today on the event of celebrating the '[NATIONAL DENTIST DAY](#)' which falls on the 6th March of every year we like to appreciate the efforts taken by the [DEPARTMENT OF PUBLIC HEALTH DENTISTRY](#)- THE STAFFS AND OUR SENIORS to give importance to this day and make it a memorable one.

This year on our part we celebrated this day with all precautions during this [COVID-19](#) pandemic

With all self and social awareness protocols and with social distancing to make this day a memorable and constructive one.

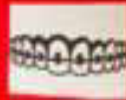

This year we the batch A of 2017-2018 BDS involved ourselves with dedication and sincerity and did the badges, pamphlets, hashtags, photograph props, charts and also gave a small orientation to the newly joined first years of BDS on the importance of dentistry, its branches and life after BDS. We also conducted other events such as slogan writing, soap carving, jokes and memes among our juniors in offline mode and encouraged participation from them.

The overall process was worthwhile and we enjoyed and did our work. There was a good team work and our efforts were fruitful.

CHARTS

Branches of Dentistry

Study that deals with diagnosis & related management of root disease

A branch of dentistry concerned with diagnosis & treatment of the (1) root (pulp) inside a tooth and root canal

The science of dentistry that involves direct removal of primary dental caries through surgical removal of pulp

AIM:

- To create awareness about national dentist day
- To make the students aware about importance of studying dentistry.

OBJECTIVES:

- To spread awareness among students that taking dentistry as a career is the best decision.
 - To know there is something beyond 32 teeth.
- 27 To increase awareness on the branches of dentistry and things that not everyone are aware of taking the profession and distributed pamphlets and tooth brushes, pastes and used it to explain to the public.

PARTICIPANTS:

A batch :

1. Thayal Nayaki
2. Kanmani
3. Madhana Rajan

4. Aadhya
5. Aateef
6. Abigna
7. Abirami
8. Afridh Hameedha
9. Aishwarya
10. Akshaya.B
11. Akshaya.S
12. Amira

We had a great time interacting with the juniors and asked about their views on their journey of BDS so far. Due to the covid-19 pandemic we split into teams and explained pamphlets to patients in the way they can understand and talked about the importance of brushing and regular visit to a dentist to younger and elder patients.

We prepared pamphlets in Tamil and English and distributed it in public and explained to them the importance of the day, why it should be conducted.

We shared the contents of charts among ourselves which gave us knowledge on how others have thought and prepared the charts their ideology and their creativity and all efforts they have put into their work. So we exchanged the work and explained them to public taking turns.

We distributed Badges to each staff and took snaps with the props and hashtags that we designed.

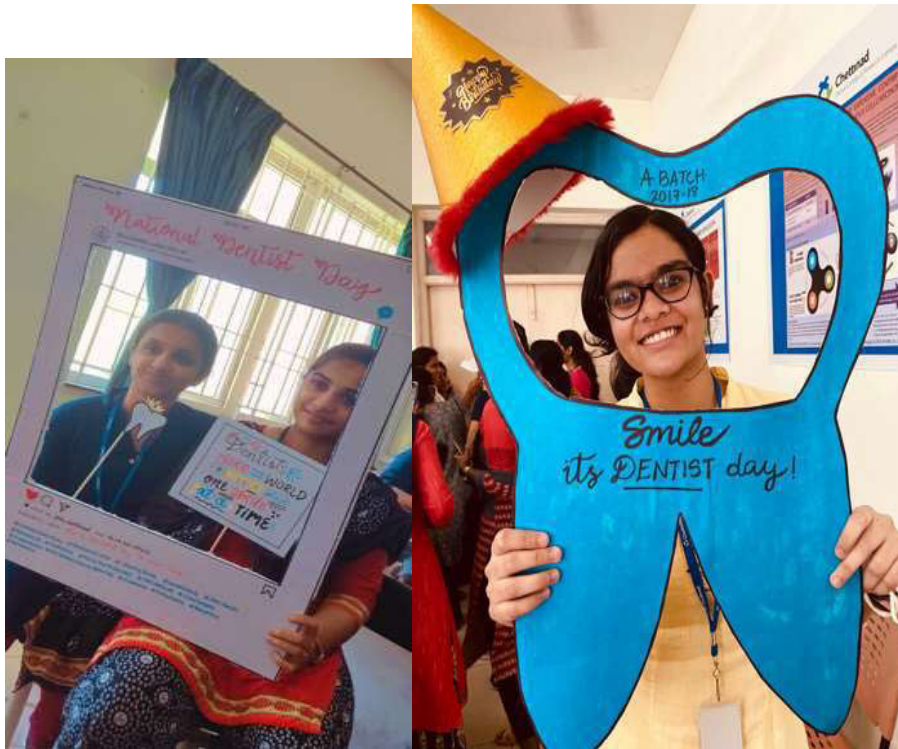

As we finished our orientation , Many of the students came with a number of doubts and suggestions what should be done after BDS for higher education,about the difficulty faced in each year.

They also shared their view on how they ended taking BDS and how their days went till date.Their view on difficulty of the activities and asked us advice to ease their skills and how to study.We also explained about the college and difficulty level of each subject in each year and how to behave towards patient.

We also made the session fun by making them take pictures through the props and with the hashtags we designed. They were really enthusiastic in participating the competitions.

After this we came and reported to the department and shared our overall experience and our learning out come to our staff members and fellow people.

OUR OVERALL EXPERIENCE AND LEARNING OUT COME

All the participants gave their valuable points on what was new on organizing and participating in the event and the overall learning out come.

- Explained the branches and further options after studying the UG course,
- Learnt how to interact with patients
- Found that altering our attitude while speaking can gain attention from them
- Active participation of each member including myself has made the event with the good outcome
- Participating in making invitations and badges. Gave knowledge as much as i could to the juniors after our interaction with them when they came up with doubts.
- I understood that even am good in art, by designing a logo.
- I also had a nice opportunity to take discussion with my batch mates and bring this event successful.
- More patient interaction
- What did I interact-
 1. About how many difficulties i faced so far and how i overcame with it
 2. About how i improved my hand skills.
 3. How to treat a patient.

All the points were given by the organising team

Overall the experience was great for all

We really had a nice chance to communicate with each other and helped to know about each other
