THEME – “Forests and sustainable production and consumption”

For celebrating **‘WORLD FOREST DAY’** which falls on the 21st of March every year, we would like to appreciate the efforts taken by the **‘Department Of Public Health Dentistry’- The Staffs And Our Seniors** to give importance to this day and make it a memorable one.

This year we the **D- Batch** of 2016-2021 BDS involved ourselves with dedication and sincerity to organize this event . Dr. Jagannatha imparted his insights on the notability of the day. There were various events that were conducted for the students. We gave awareness among school children. We as a team made the people understand using charts, pamphlets and models and also we explained about effects of deforestation . We cleared their confusions and doubts. On behalf of event we conducted games, drawing competition and provided gifts and also we planted a trees in the school campus. Both the school children and staff were participated in the event. We are grateful for the opportunity of organizing and conducting this event by the department. The overall experience was new and exhilarating.
