We are very thankful indeed for the free camp held at our campus many of our residents and staff alike benefited from the same. I wish to congratulate the team on their professionalism, hygiene and punctuality also for their commitment. Look forward to have a continued mutually beneficial relationship with the hospital which will benefit the staff as well as the residents equally.

All the best for all your
endeavours.
Regards,
Jamil

THE HEAD MASTER
Govt (ADW) High School
Pudupakkam, Kelambakkam,
Chengalpattu - 603103

To: Professor & Head,
Department of Public Health Dentistry
Chettinadu dental college & Research
Institute.

Respected Sirs,
Sub, Feedback for the dental screening
camp conducted on 24.03.2022.
We, the management of P.U.M. School,
Kazhipattur, are thankful to Chettinad
Dental College Public Health Dentistry
team for conducting a dental screening
camp and an event on world forest
day and conducted some games like
drawing. The camp for really useful
to our pupil and most of them were
benefited by the instruction provided
and oral health education given.
A health talk on 'Great oral hygiene'
was given to the children which enhanced
their knowledge. The general public were
educated about harmful effects of
restricting to undergo dental treatment
regularly.

Scanned with CamScanner

We heartfully thank you for the
same and also requesting you
conducting the same once in every
year.

Thanking you.

Date 24.3.2022.
Kazhipattur.

Your sincerely
C.D. D.S.M. HC

The college faculty especially my treasured Public Health department faculties has guided and helped me immensely through this journey to perfecting my knowledge and improving my experience in public health aspect.

They helped me develop not only my clinical skills but also gave me the stage to use my talents and work as a team on that front as well leaving me with some memories to cherish for a lifetime. We have visited many schools, churches and public places instilled and improved the knowledge of general public regarding oral health practices. We gained lot of knowledge on how to handle parents in prospective of their required needs, especially reaching them in their own language. I have enjoyed the experience of being groomed at an institution like this and I am positive that I would not have had the same experience elsewhere. I feel more confident to go out and actively chase my ambitions and goals.

Deepthika
(KI
[2017-23])

First at all, I would like to express my gratitude to the respected faculty members of Department of Public Health Dentistry for making me discover my inner talents. The department helped me improve my skills of identifying health problems affecting the society, conducting health surveys, and conducting health education campaigns. Immense encouragement was provided to conduct and organise camps at various places like schools, institutions, old age homes, orphanages, churches. This helped me develop my communication skills. Conducting various special events gave me an opportunity to create awareness amongst the public about various aspects. I would be ever grateful to the department of Public Health Dentistry for improving my self confidence and self-esteem.

Chithaluru Puarathi

[CB17-23]

I, being a CRI, when posted in the Department of Public Health Dentistry was extremely overwhelmed.

Organizing dental screening camps among the school or college students, old age and rural population was the best part. It feels so contented when we lend our service to them and see the smile on their face.

Apart from this, we also had various other extra-curricular activities like special events, demonstration of oral hygiene practices etc. Making the young and old understand the smallest of things gives us the greatest joy in life. Knowing the difficulties faced by the public, understanding their difficulties and reaching out to them through this department is simply awesome. This has been creating a huge impact on the positive aspect of our life.

- Benny Joseph Raj
